

# QIV.net – Product Sheet

Quotes-In-View

Input 1, LLC

August 2004

**Summary:** This document describes the technological overview for the .net version of Quotes-in-View. With recent advances in the internet and web browser technology the ability to develop a robust, scalable, browser based application is now possible. The use of a web browser significantly reduces deployment and maintenance costs because all updates need only to be made on the server and users can access the system from multiple locations without any setup. This means that employees, agents and insureds can access the system from home, work or from any remote location that has a web browser and internet connection. QIV is written using the next generation of tools for developing enterprise applications, with proven design patterns which allow it to be easily customized and trusted to handle your most mission-critical business functions. QIV takes advantage of advanced features of Microsoft's .NET platform giving you the most up to date and sophisticated software on which to run your business.

## QIV Overview

Technology Summary	
<b>Platform</b>	Microsoft .NET; .NET Framework, ASP.Net, Delphi, SQL Server, IIS (Internet Information Server), Windows Server
<b>Languages</b>	VB.net, Object Pascal, SQL, T-SQL, JavaScript, HTML, CSS
<b>Logical Architecture</b>	Scalable N-Tier Architecture
<b>Physical Architecture</b>	3-tier; Client Web Browser, Web Server, SQL Server Database
Security	
<b>Encryption</b>	SSL (Secure Sockets Layer), MD5 and others
<b>Operating System</b>	Hardened Windows Server 2003
<b>Conditional Access</b>	Group based security policies for users
<b>Auditing</b>	Login attempts audited, configuration field changes audited
Client System Requirements	
<b>Computer and Processor</b>	Personal computer with an Intel Pentium 233-MHz or faster processor (Pentium IV recommended)
<b>Memory</b>	128 MB of RAM or greater
<b>Hard Disk</b>	None.
<b>Monitor</b>	Super VGA (800 × 600) or higher-resolution monitor (1024 x 768 recommended)
<b>Operating System</b>	Microsoft Windows 95 or greater
<b>Browser Application</b>	Recommended -Internet Explorer 6.0 or greater, Netscape Navigator 7.1, Mozilla 1.6 Minimum – Internet Explorer 4.0 or greater, Netscape Navigator 4.71 or greater, Mozilla 1.0 or greater
<b>Internet Connection</b>	56 Mbps minimum, 384 Mbps or greater recommended
Database Server System Requirements (Non-hosted model)	
<b>Computer and Processor</b>	Server PC with an Intel Pentium 1 GHz or faster processor (depending on usage, 2 processors recommended)
<b>Memory</b>	1 GB or greater (depending on volume)
<b>Hard Disk</b>	5 GB+ of available hard-disk space (depending on projected volume)
<b>Operating System</b>	Microsoft Windows 2003 Server, Microsoft Windows 2000 Server
<b>Database</b>	Microsoft SQL Server 2000
Web Server System Requirements (Non-hosted model)	
<b>Computer and Processor</b>	Server PC with an Intel Pentium 1 GHz or faster processor (depending on usage)
<b>Memory</b>	512 MB or greater (depending on volume)
<b>Hard Disk</b>	1 GB of available hard-disk space
<b>Operating System</b>	Microsoft Windows 2003 Server, Microsoft Windows 2000 Server
